PROFESSIONAL SUMMARY

Senior Full Stack PHP Developer with 6+ years of experience specializing in Laravel, full-stack web development, IoT solutions, and scalable software architecture. Proficient in Laravel, CodeIgniter, Symfony, and modern web technologies including Docker, Redis, AWS, and CI/CD pipelines. Demonstrated success in leading agile and hybrid teams of up to 6 developers across global projects, optimizing performance, and reducing delivery cycles through automation and process refinement. Expert in Shopify app development, API integrations (Stripe, Twilio), and DevOps tools. Known for mentoring junior engineers, driving technical innovation, and creating robust documentation to support scalable team growth. Seeking to contribute leadership and advanced Laravel/PHP expertise to a forward-thinking development team.

TECHNICAL SKILLS

Languages & Frameworks: PHP 7.x/8.x, Laravel, CodeIgniter, Symfony(basic), JavaScript, jQuery, Livewire, HTML5, CSS3, Bootstrap, C#, C++, Java, XML, Python (basic), Gadget.dev

Databases: MySQL, Cassandra, Firebase, SQLite, PostgreSQL, MongoDB

Tools & DevOps: Git, GitHub, Docker, Nginx, Forge, AWS, Digital Ocean, Redis, Visual Studio, Android Studio, Slack, Zoom, Microsoft Teams

APIs & Services: RESTful APIs, Stripe, Twilio, Pusher, MQTT, Shopify APIs, PayPal, Authorize.net, Instagram API

Others: MVC, HMVC, CI/CD, Tailwind CSS, BLE integration, Firebase Firestore, SDLC methodologies (Agile, Scrum), ClickUp, JIRA

Soft Skills: Team Leadership, Remote Collaboration, Mentorship, Problem-Solving, Time Management, Communication, Decision-Making, Adaptability, Analytical Thinking

PROFESSIONAL EXPERIENCE

Programmers Force (SHUFTI) — Team Lead / Principal Software Engineer

Jun 2025 – Present | Lahore, Pakistan (Onsite)

- Led development of key Shufti modules including Age Verification, VJB (Journey Builder), and BBV (Behavioral Biometrics), creating clear implementation plans and identifying blockers early.
- Managed sprint planning, task allocation, and daily leadership of the engineering team to ensure smooth delivery.
- Conducted code reviews, enforced best practices, and validated end-to-end flows to maintain high code quality.
- Oversaw production deployments with **zero production errors**, ensuring stable and reliable releases.
- Acted as the bridge between **Product, SQA, and Engineering**, translating requirements into actionable technical tasks.

Vaival Technologies — Senior Software Engineer

Jun 2023 – Present | Lahore, Pakistan (Onsite)

- Spearheading a remote team of 5 developers in the CareCart product line, delivering Shopify-based SaaS features used by 2,000+ customers.
- Delivered the Jaiza App module 2 weeks ahead of schedule, enhancing project efficiency by 25% and reducing QA feedback loops by 30%.
- Engineered core business logic, admin dashboards, and advanced analytics features.
- Optimized reporting engine by reducing data retrieval time by 30% using Redis caching and efficient queries.
- Mentored 4 junior developers, boosting their contribution efficiency.
- Deployed Dockerized services and fine-tuned Nginx for scalable, high-availability environments.
- Conducted research and implemented a prototype for Shopify checkout UI extensions.
- Detailed research and documentation on low code platforms to revamp all applications to a new stack and environment.
- RnD on **gadget.dev** and hands on experience of moving 3 applications on this platform of MERN from PHP stack.
- Collaborated with frontend developers and QA engineers to ensure cohesive functionality and efficient rollouts.

OnyxTec — Senior Full Stack Developer

Oct 2021 – May 2023 | Lahore, Pakistan (Onsite)

- Orchestrated a hybrid team of 6 developers across 8 major web application projects, ensuring 100% on-time delivery.

- Architected scalable backend solutions with Laravel and led sprint planning for over 100 feature releases.
- Acquired fundamental knowledge of Vue.js, Tailwind CSS, livewire (Laravel) within a few months and also gained hands-on experience working with it.
- Trained and mentored 6 junior developers, accelerating onboarding by 40% and raising code quality.
- Mainly worked with Laravel PHP framework and Forge, while also maintaining AWS, Digital Ocean, and shared hosting. Used GitHub hosting platform for teams to collaborate.
- Created internal documentation and user guides, streamlining team communication and onboarding processes.
- Developed expertise in various technologies including, Pusher API for building chat systems, Stripe for payment processing, Twilio and other third-party APIs.
- Participated in weekly brown bag sessions to learn new skills, and covered over 20 topics and demo projects.

Solution Summit — Full Stack Developer

Nov 2020 – Oct 2021 | Lahore, Pakistan (Onsite)

- Delivered a comprehensive system with 10+ modules and real-time analytics accessed by 500+ users.
- Integrated Stripe and Instagram APIs, and implemented caching layers that reduced response times by 22%.
- Integrated Instagram API for marketing purposes, as well as Stripe, PayPal, Authorize.net, and Twilio payment APIs to enhance application functionality.
- Rolled out a unit testing strategy that lowered post-deployment bug rates.
- Conducted UI/UX optimizations based on user feedback, increasing session durations.
- Designed backend architecture in collaboration with UI/UX designers and QA testers, ensuring seamless functionality across teams.
- Developed applications using CodeIgniter and Laravel framework. Programming languages are PHP 7.4.9. Frontend languages are html, CSS, bootstrap, jQuery, JavaScript

InventorX Technologies — PHP Developer

Oct 2019 – Sep 2020 | Lahore, Pakistan (Onsite)

- Developed and launched 6 ERP (Enterprise Resource Planning) systems used by over 15 client businesses.
- Built a test scheduling management module, along with reports and graphical dashboard, for iEMS system, achieving successful deployment and functionality.
- Gathered and developed challenging iERP requirements within a tight timeframe, providing thorough client support throughout the process.
- Managed and developed 6 major ERP projects, serving as the main point of contact for clients and ensuring their satisfaction with project outcomes.
- Developed and debugged iPOS system using Laravel framework, improving system performance and reliability.

- Utilized various frameworks including CodeIgniter (MVC), Laravel (MVC), and a customized framework (HMVC), with programming languages such as PHP 5.6.4 and 7.2.3 and front-end languages including HTML, CSS, Bootstrap, jQuery and JavaScript.

Powersoft19 — Junior Software Developer

Mar 2019 – Sep 2019 | Lahore, Pakistan (Onsite)

- Contributed to an IoT-based security project at Powersoft19, implementing office cabinet security using a sprint scrum framework.
- Successfully built a Non-Functional Protocol with Rest and MQTT, ensuring reliable communication between devices.
- Developed a console application in .NET Core with C# in Visual Studio, enabling PUT, POST, DELETE, and UPDATE commands for the same project via Rest and MQTT.
- Designed and developed a desktop application on Windows 10 that connects to Bluetooth Low Energy (BLE) devices and pairs with tablets automatically, enabling data transfer between devices.

EDUCATION

BS Software Engineering

Superior University, Gold Campus, Lahore

Oct 2016 – Jun 2020

Academic Projects:

- **Office Automation & Scheduling System (FYP)**
 - Built an IoT-based automation system to control office appliances remotely using a mobile app.
 - Integrated a scheduling system for faculty with real-time office presence tracking.
 - Developed a face recognition and PIN-based access control for door security.
 - Created a feedback and complaint module for users.
 - Tech stack: Java, PHP, C++, JavaScript, Firebase, SQLite, Raspberry Pi.
- **Mobile App for Bus Ticket & Hotel Booking**
 - Led a team of 5 students to develop an engaging and impactful mobile app for booking travel and accommodation.
 - Used XML and Java with Android Studio to deliver a fully functional, user-friendly application.
- **Smart Helmet Project**
 - Designed and developed an IoT-powered safety helmet featuring real-time sensor data monitoring.
- **Store Inventory Mobile App**
 - Built a dual-interface inventory management app for retailers and customers using Firebase.

PROJECT HIGHLIGHTS

- <https://thefastlanes.co/> – High-performance Laravel web app for employee reviews.
- <https://mydogsid.com/> – CodeIgniter application for tracking the pet dogs.
- <https://careers.onyxtec.co/> – Career portal with multi-user access control.
- <https://www.buildmarker.com/> – Construction task management tool.
- <https://pulse.onyxtec.co/> – Realtime analytics dashboard using Laravel + Vue.js.
- <https://carequorum.com/> – Patient support and tracking application.

CERTIFICATIONS & ACHIEVEMENTS

- Superior Hackathon 2019 – Finalist
- Superior Entrepreneurial Demo Day – Presenter
- LeMUN'18 & SUMUN'18 – Delegate
- Corridor to English – Certificate of Completion

View Degrees & Certifications: [Click to View](#)

PERSONAL PROJECTS

- Developed Android app for general store inventory using Firebase and SQLite.
 - Created a smart helmet and IoT-based office automation system as final year projects.
-
